

We Care For Your Health Asset  
& The Environment

### Disclaimer:

Strict adherence to the Standard Operating Procedure (SOP) is required in order to obtain highest quality result(s).

Accredited Applicators Trainer & Certified by Airestec are recommended to be used. Kindly contact us for clarification.  
(Only for Malaysia)

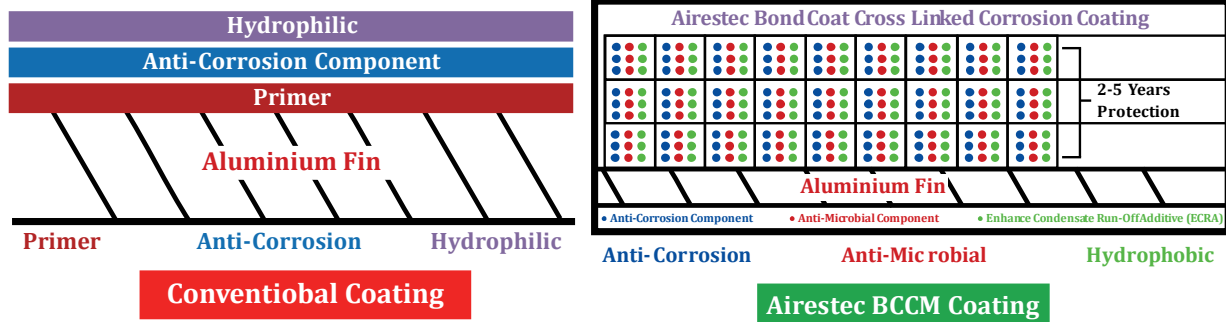

## ANTI-CORROSION / ANTI-MICROBIAL BOND COAT (BCCM)

- Single-layer coating with self-etching property epoxy water-based finish.
- Protect indoor evaporator & outdoor condenser coils from corrosion & oxidation.
- Increase coil strength.
- Ensure system runs at optimum efficiency.
- 12 - 36 months warranty.

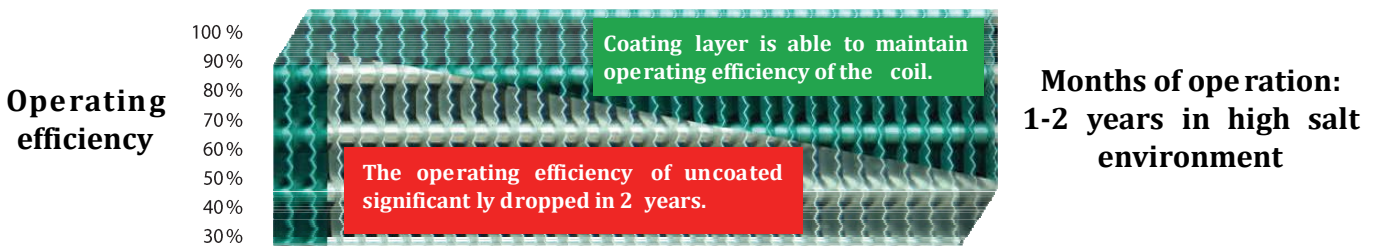

# ANTI-CORROSION / ANTI-MICROBIAL BOND COAT (BCCM)

Airestec Anti-Corrosion/Anti-Microbial Bond Coat (BCCM) is an innovative solution that provides unparalleled, end-to-end anti-corrosion protection with anti-microbial features through a unique coating applied to coils and surrounding casing. The application is proven to deliver long term protection against environmental corrosion and harsh weather conditions including at the seaside.

The conventional coating requires different layers to achieve anti-corrosion properties, while our method is only a single and ultra-thin layer coating. Therefore, it does not affect the heat exchange efficiency of the cooling coil.

**Months of operation:**  
1-2 years in high salt environment

*The difference of Operating Efficiency between Coated and Uncoated Coil.*

## OEM & IN-SITU

### Special features of Airestec Anti-Corrosion/Anti-Microbial Bond Coat (BCCM)

- Anti-Corrosion/ Anti-Microbial property
- OEM and/or In-Situ
- Anti odour
- Easy for maintenance/cleaning
- Low dust adhesion
- High chemical and UV resistance
- Water shading properties
- Flexible coating
- Non-flammable
